# Where Does RiyalPay Lose Its Users?

From completed signup to first successful transaction

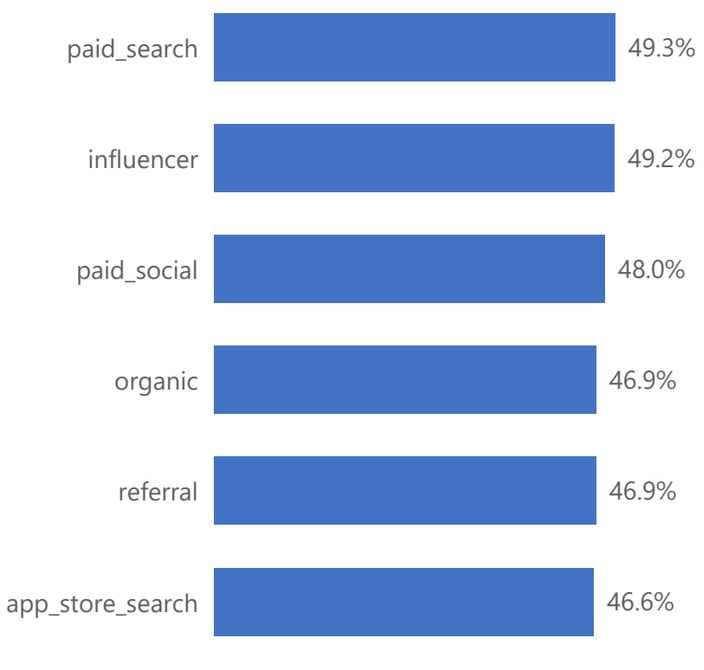

Signups through May 2026 (mature cohorts: all had 6+ weeks to transact)

Platform: All | Acquisition Channel: All | City: All | Age Group: All

| Total Signups | Signups who never start KYC | KYC Approval Rate | Activation Rate | Median KYC review time | Median time to start KYC |
|---|---|---|---|---|---|
| 23,287 | 35.6% | 82.8% | 47.5% | 7.8 hrs | 4.3 hrs |
| | Signup to KYC Start Rate 64.4% | | | | |

## Does Acquisition Channel Matter?

Activation rate by signup channel

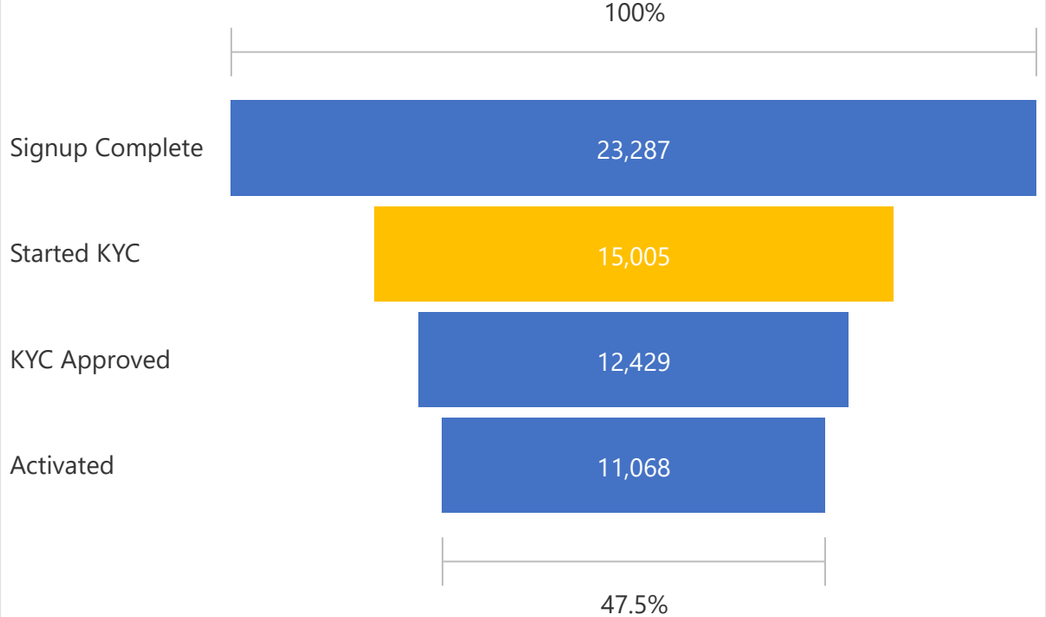

## iOS vs. Android: Same Activation Story?

Activation rate by platform

## Only 47.5% of Signups Ever Make a Transaction

Users reaching each stage of the activation journey

# Do Users Stay After They Join?

Share of each signup cohort still active, by months since signup

Cohorts: signups June 2025–May 2026 · Active = any app event in the month · complete months only

Platform: All

Acquisition Channel: All

| Active at Month 3 | Active at Month 6 | Inactive by Month 6 |
|---|---|---|
| 68% | 52% | 48% |
| Cohorts Included **10** | Cohorts Included **7** | |

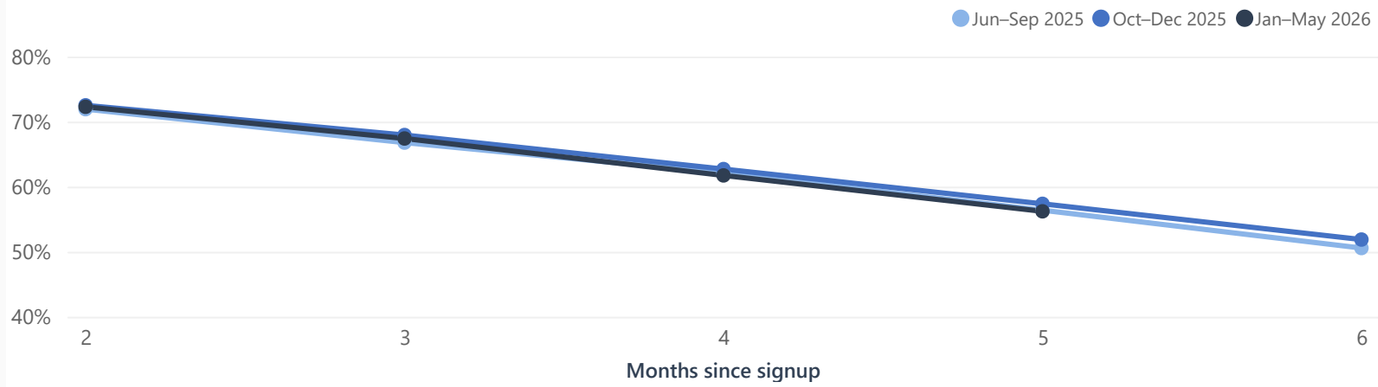

## Retention Declines After Month 2, Cohort After Cohort

% of each cohort active in each month after signup (any app event)

| Signup Month | Month 1 | Month 2 | Month 3 | Month 4 | Month 5 | Month 6 |
|---|---|---|---|---|---|---|
| **Jun 2025** | 63% | 76% | 73% | 66% | 57% | 52% |
| **Jul 2025** | 63% | 70% | 65% | 59% | 54% | 48% |
| **Aug 2025** | 61% | 71% | 65% | 61% | 56% | 50% |
| **Sep 2025** | 65% | 73% | 67% | 64% | 58% | 52% |
| **Oct 2025** | 67% | 73% | 68% | 63% | 58% | 52% |
| **Nov 2025** | 68% | 73% | 68% | 64% | 58% | 53% |
| **Dec 2025** | 66% | 72% | 68% | 62% | 56% | 51% |
| **Jan 2026** | 59% | 71% | 66% | 62% | 56% | |
| **Feb 2026** | 65% | 72% | 68% | 62% | | |
| **Mar 2026** | 67% | 73% | 68% | | | |
| **Apr 2026** | 64% | 72% | | | | |
| **May 2026** | 66% | | | | | |
| **All Cohorts** | **65%** | **72%** | **68%** | **62%** | **57%** | **52%** |

## Are Newer Cohorts Retaining Better?

% of users active, by months since signup. If the lines overlap, newer cohorts retain no better than older ones.

## Does Channel Affect Retention?

Active at Month 3, by acquisition channel

## iOS vs. Android: Same Story?

Active at Month 3, by platform

**Note:**

Month 1 is understated: activity in a user's first 30 days after signup is not captured in this dataset, so retention appears to rise from Month 1 to Month 2. Read the decay from Month 2.

# What Do Users Actually Do in RiyalPay?

Feature usage among users with at least one successful transaction

Signups through May 2026 · Successful transactions only (refunds excluded)

Platform: All | Acquisition Channel: All | City: All | Age Group: All

## Users Who Transacted

Made 1+ successful transaction

**11,068**

## Features Used per User

Average out of 4 features

**3.4**

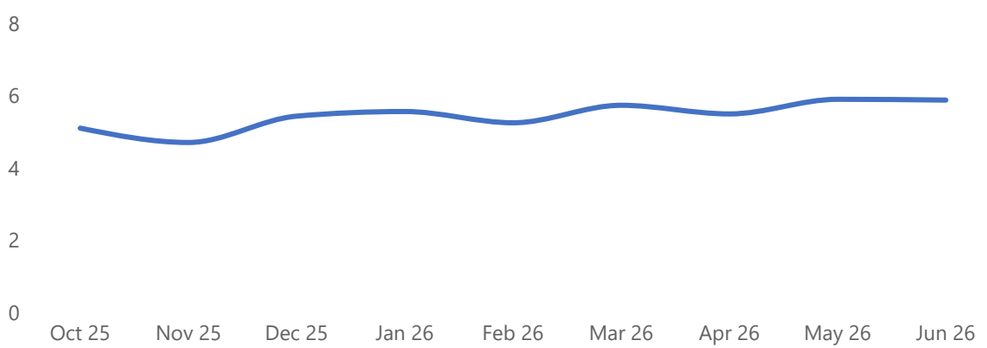

## Which Features Do Users Adopt?

% of transacting users who used each feature at least once

## Do Users Transact More Over Time?

Successful transactions per transacting user, by month

## Transactions per User

Lifetime successful transactions

**23.2**

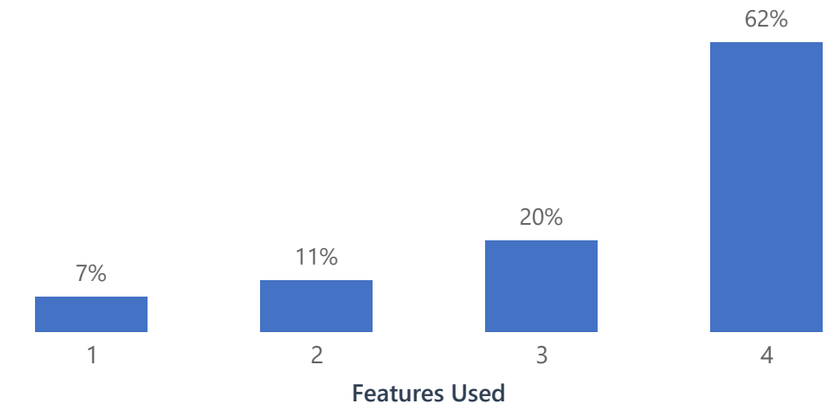

## Top-up & Transfer Success

Completed attempts, excl. pending

**94.7%**

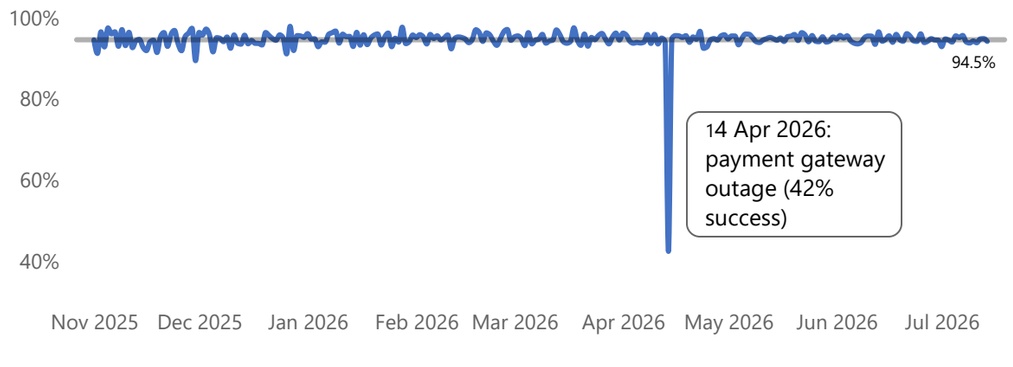

## How Many Features Does Each User Try?

Share of transacting users by number of features used

## Where Did Top-Ups Fail?

% of top-up attempts that completed, by day from Nov 2025 (pending excluded)

Adoption = used the feature at least once. Success rate covers top-ups and transfers only; bill pay and cashback have no failure records in this dataset. Refunds are excluded throughout.

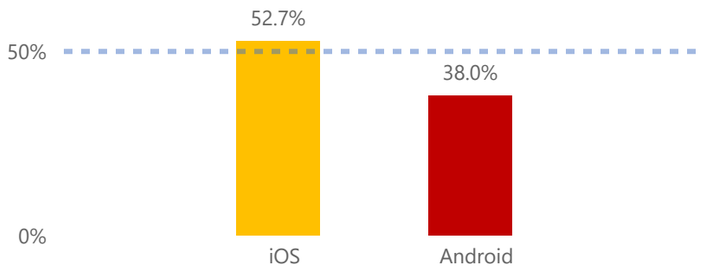

# Did the Streamlined KYC Flow Work?

exp_kyc_streamline_2026 · 2 Feb – 16 Mar 2026 · 5,969 assigned users

Platform: Android | iOS

## Did Both Platforms Get a 50/50 Split?

Share of assigned users who got the new flow

## Is the Imbalance Just Chance?

Test against an intended 50/50 split (p < 0.01 = imbalance)

| Platform | Control | Treatment | Treatment Share | p-value | Status |
|---|---|---|---|---|---|
| iOS | 1,055 | 1,175 | 52.7% | 0.011 | Borderline |
| Android | 2,319 | 1,420 | 38.0% | < 0.001 | SRM detected |
| **All platforms** | **3,374** | **2,595** | **43.5%** | **< 0.001** | **SRM detected** |

## Users in Both Arms

Excluded from all results

**43**

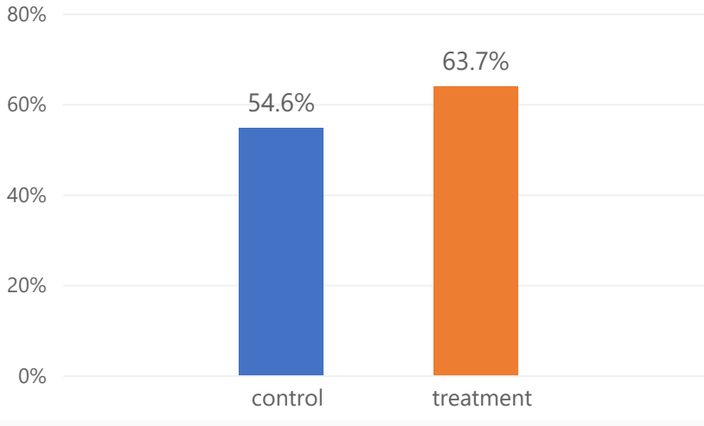

Contamination Rate **0.7%**

**Assignment check (iOS): Borderline · p = 0.011**

**Decision: ship to iOS now; hold Android until its assignment bug is fixed and re-tested.**

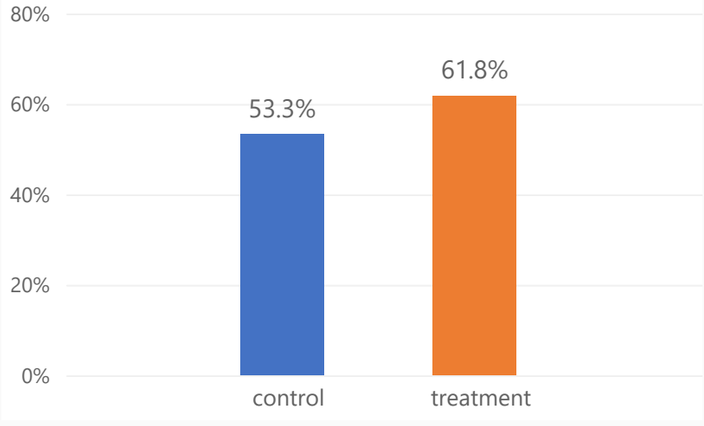

## KYC approval: +9.1 pts

95% CI +5.1 to +13.2 · p < 0.001 · n = 1,055 vs 1,175

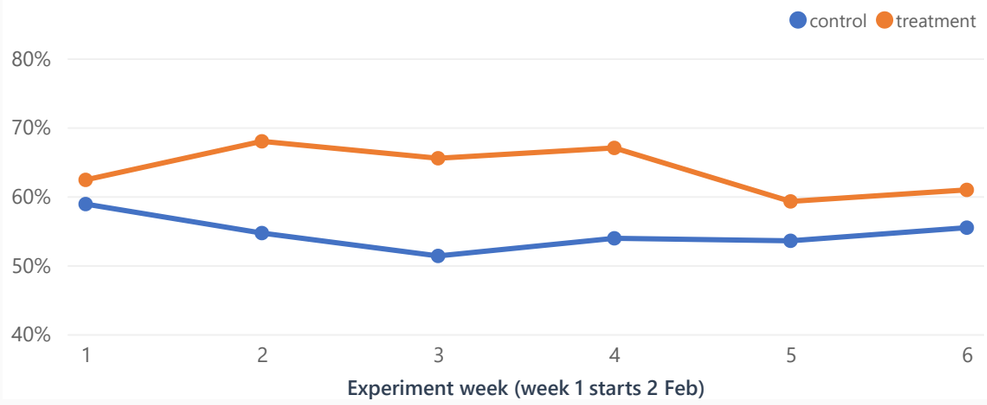

## Activation: +8.5 pts

95% CI +4.4 to +12.6 · p < 0.001 · n = 1,055 vs 1,175

## Is the Lift Holding Up Week by Week?

KYC approval by experiment week (about 170–210 users per arm per week)

Users assigned to both arms are excluded from results. Intervals are Wald 95%; p-values are two-proportion z-tests. Power on iOS is about 99% (see notebook). Android results are shown for reference only: its assignment was not random
